Button Function Description

Kind tips :

1.Sleep Mode

- Light Sleep: The mouse immediately enters light sleep after it stops working.
- Deep Sleep: The mouse enters deep sleep without any operation for a long a few minutes

2.Sleep Wake Up Method

- Light Sleep: Wake up the mouse by moving it
- Deep Sleep: Press any key to wake up the mouse

3.Hardware connection: Insert the product's USB plug into the USB port

Connection Mode

1.Bluetooth connection method:

1.The power switch must be in the Bluetooth segment;

2.Press and hold the left, middle, and right mouse buttons simultaneously for about three seconds until the Bluetooth light flashes quickly. Then, enable Bluetooth on your mobile phone or other device that needs to be paired. When "IGNIX F7 (or IGNIX F7 PRO for the pro version)" appears, select it to connect. Once the connection is successful, the pairing light will stay on briefly and then turn off.

2.Wireless dongle 2.4G method:

1. To use the mouse on the 2.4G channel, switch the power button to the 2.4G position. Then, remove the 2.4G receiver and plug it into an available USB port on your computer. The computer will automatically recognize the configuration. If there's no response when you plug in the receiver, try using a different USB port. Alternatively, the mouse light will briefly stay on and then turn off.

Visit vortexseries.net to download the software and find information about the product warranty and other details.

3.Wired mode connection method

Use the provided TYPE-C cable to connect the mouse to the computer. Once the cable is plugged in, the mouse will default to wired mode and begin charging. You can use the mouse normally, and the computer screen pointer will move as you move the mouse.
