Description of FN multimedia function key of WIN system:

FN multimedia function key description for MAC system:

03

When using the Mono Series mechanical keyboard and the computer cannot recognize it, it should be considered that poor end contact may cause it to need to be replaced and plugged into another computer's USB port for use.

Troubleshooting Freezing or Stopping Issues:
When the product is stuck or a key character is not functioning or does not move during use, it should be considered that the shaft pin is loose, which may be caused by poor contact after multiple insertion and extraction. The shaft should be pulled out to see if the shaft pin is bent. In addition to ruling out the above reasons, if it still cannot be solved, please call the VortexSeries Product Service Hotline.

Disposal of Damaged Products:
The product of VortexSeries brand are all electronic products, so for the sake of stable product performance and user safety, the products can only be used indoors at room temperature. Please do not use them at high temperatures or near ignition sources. If the product is damaged and cannot be repaired, please do not disassemble or throw it into the fire to avoid accidental danger. It should be sent to a professional waste disposal station or a dedicated recycling bin for disposal.

PACKING LIST:

- 1. Mono 100 V2 Keyboard.
- 2. Keycaps Puller
- 3. Switch Puller
- 4. Type - C Cable
- 5. A copy of the manual and warranty card.
